UNITED STATES DEPARTMENT OF AGRICULTURE

Extension Service and Production and Marketing Administration Cooperating

SOYBEAN AND FLAXSEED SUMMARY

For the Crop Year beginning July 1943 for Flaxseed, and October 1943 for Soybeans

An annual summary of the grading of soybean (pages 2-3) and flaxseed (page 4) receipts, prepared jointly by the Extension Service and the Production and Marketing Administration. The grains covered by this report were graded according to the official grain standards of the United States.

The special grade for Weevily Soybeans may be summarized as follows:

Soybeans that contain two or more live weevils, or 1 live weevil and 10 or more other insects, or 25 or more other insects alone, in a 1,000-gram portion of the original sample is graded weevily.

See Handbook of Official Grain Standards of the United States for complete definitions and grade requirements.

Note. This leaflet completes the summary for the 1943 Crop. Other leaflets released for the 1943 crop are:

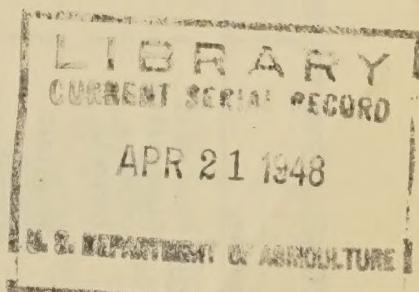

Wheat and Rye Summary, issued September 1945

Barley and Oats Summary, issued September 1945

Corn and Grain Sorghums Summary, issued January 1946

These are the first reports released in this form. They are prepared in some detail to give comprehensive information on crop quality in the producing areas. The 1944 crop figures are now being summarized for similar reports. The 1945 crop figures will not be available until after the end of the crop year, in the summer and fall of 1946.

Suggestions for the content of future reports are invited.

Issued January 1946

1108 Post Office Building
Chicago 7, Illinois

SOYBEANS: Inspected Receipts, designated markets, October 1, 1943 - September 30, 1944, with comparisons. In terms of carloads
